SURGERY
INSTITUTE

Dr Deon Van Der Westhuizen

MB ChB PRET (1984), FCS (SA) (PLAST)(1994), MMED (PLAST AND RECONS) STELL (1994)

Plastic and Reconstructive Surgeon

“I study that which comprises individual beauty. My aim is to achieve subtle, authentic and durable results.”

**INTEGRATING
MODERN SURGICAL AND
NON-SURGICAL TREATMENT
TECHNIQUES**

“I started my private practice in 1994 and I maintain an office and surgery in the Cosmetic Surgery Institute in Cape Town,” says Dr Van der Westhuizen.

He specialises in aesthetic surgery, skin cancer reconstruction and the integration of modern surgical and non-surgical treatment techniques to restore and maintain faces and bodies affected by ageing and disease.

**MODERN FACIAL
SURGERY PROCEDURES**

Dr Van der Westhuizen's modern facial surgery procedures include small scar keyhole brow lift and repositioning, minimally invasive restoration of eyelids, structural facial fat grafting, facial implants and modified extended deep plane face and neck lift procedures.

“I also perform body sculpting surgery with the SAFE liposculpture technique and PAL system for safety, and the short scar breast lift and reduction method for superior results,” he says. Dr Van der Westhuizen also performs non-touch breast implant placements, aimed at restoring proportion and recovering poorly functioning implants.

“We work hard to reduce pain, expedite recovery and aim to achieve results which are defined synergistically with patients as far as possible.”

**MINIMALLY
INVASIVE OPTIONS**

A minimally invasive Facial Rejuvenation clinic helps to maintain patients' faces before and after surgery, and offers alternatives to surgery.

“We use injectables such as body own tissue and HA (Juvederm) synthetic fillers, neuromodulation (Botox),” says Dr Van der Westhuizen, “as well as Thermage radiofrequency face and body collagen stimulation treatments.”

Dr Van der Westhuizen travels regularly and extensively in order to stay in touch with new surgical and non-surgical treatment developments.

**AUTHENTIC AND
DURABLE RESULTS**

“I am interested in what comprises individual beauty and what motivates and informs the quest for beauty and performance by patients,” he says. “My aim is to achieve subtle, authentic and durable results that are better, not different.”
